

HSE quality and environment policy

It is the policy of Glassfiber Produkter AS to meet all requirements from interested parties, applicable legal and statutory requirements, and codes of practice, including ISO 9001:2015.

Quality

The documented quality management system of Glassfiber Produkter AS covers:

- the supply of fiberglass / composite products and the provision of related consulting services
- design of structures of fibreglass
- the supply of commercial sector products
- the general business of Glassfiber Produkter AS

We seek to continually improve the effectiveness of the Quality Management System, by proposing actions to improve our existing quality objectives and establish new objectives, wherever our system may benefit from doing so.

Product and delivery performance is reviewed via data collected from client response, suppliers and manufacturers testing and development. Wherever practical we will investigate with our suppliers to provide improved products and services.

We monitor our suppliers and business partners to ensure that they comply with the same ethical and authority-imposed requirements that we apply ourselves.

Health, Safety and Working Environment

Zero damage to material and people is our overall goal.

It is the policy of Glassfiber Produkter AS to ensure that all work is carried out with careful regard and due consideration to the employees' health, safety, working environment. We ensure this by continuously evaluating risk and opportunities using best practice principles, and implement and maintain health, safety, and environmental procedures for support.

Environment

It is the policy of Glassfiber Produkter AS to reduce the amount of waste and optimize use of resources, prevent pollution, and reduce negative impact on the environment.

We manage this by:

- evaluating operations and ensuring they are as efficient as possible to minimise waste
- selecting the most environmentally sound transportation solutions
- monitor and report on use of resources and waste management
- ensures that our suppliers adhere to the same standards
- we challenge the waste industry to focus on recycling
- being engaged in the work to improve the reuse and recycling of fiberglass, through membership in interest organisations and being a driving force behind the waste industry

Elling Stangeland
